

# MASARU **inku**

12-strand PE braided line, with great castability and tensile strength. Thanks to its rounded profile, smoothness and specific coating, it glides through the rod guides with practically no friction during casting, maximising the lure casting distance and avoiding unpleasant noises during retrieval.

Its bubblegum pink colour helps you to monitor the position of your line at all times in order to maintain the line tension and control even the gentlest of takes to ensure a successful bite.

Perfect for super-technical fishing such as eging and rock fishing.

**Supplied in 150m spools. Pack of 6 spools.**

Price per spool.

# MASARU **jerk**

12 fibre PE braided line. Thanks to the fibre coating and innovative braiding process, we have achieved a round, extra-fine line with a calibrated diameter along the entire length.

These features mean that, when fishing, the line will experience minimal friction and offer tremendous strength, even in the extremely fine starting diameters.

Perfect for super-technical fishing such as eging, rock fishing and light spinning. High visibility silver.

**Supplied in 150m spools. Pack of 6 spools.**

Price per spool.

# MASARU **pearl**

8 fibre PE braided line. The pre-braiding treatment of the fibres achieves a really soft feel and gives an extremely round and uniform shape.

Normally, these characteristics involve a gradual loss of colour and strength, but this doesn't happen with the MASARU PEARL.

In fact, there are no changes to the initial line characteristics even after many days of fishing. Green.

**Supplied in 150 and 300 m spools. Pack of 6 spools.**

Price per spool.

# POWER MASARU

8 fibre PE braided line, offering a uniform, round diameter and extraordinary strength. Being dark green in colour, it is perfect for spinning or light jigging, whilst it is long-lasting thanks to its surface treatment. During the fishing action, the line moves smoothly through the guides, with little friction, as if it were a mono-filament line.

Colour: Dark green.

Presentations:

- 150 and 300 metre spools in boxes of 6 spools.

- 1000 and 2000 meter spools.

Price per spool.

# MS-9

9 fibre PE braided line, made with the innovative and exclusive MSP (Multi-Phase Continuous Process). This allows for the continuous braiding of groups of variable fibres, to create a totally compact, homogeneous and uniform line, superior to any other braided line on the market.

This process provides a strength that is 35% higher than that achieved for similar lines braided with the traditional system. What's more, the MSP technology achieves a much rounder braid, guaranteeing a knot resistance and abrasion resistance that are far superior to any traditional braid. Colour: Dark green.

Presentations:

- 150 and 300 metre spools in boxes of 6 spools.
- 1000 meter spools.

Price per spool.

# MASARU tuna

Braided line specifically designed for rigging assist hooks for tuna and large predator fishing. Its compact structure makes it difficult for fissures to appear, which would weaken the rigs. Colour: brown.

- Supplied in 30 m spools. Pack of 6 spools.

Price per spool.

REF.	MM.	LBS	€
LAMT150	1,50	670	

# KAZUMA gloss MAX

8-strand PE braided line, specifically designed for egging enthusiasts. Its innovative braiding process, at maximum pressure, produces a more compact line that it absorbs less water during the fishing action. Thanks to its sensitivity and low elasticity, you can work your egis with great precision and will detect even the smallest squid bites.

Its innovative coating minimises resistance through the guides, achieving longer casts and minimising the formation of the much-feared "birds nests" when casting extremely light weights on windy days. Hi-vis pink when out of the water.

- Supplied in 150 and 300 m spools. Pack of 6 spools. Price per spool.

# 8XK

High quality 8-strand PE braided line.

Thanks to its innovative manufacturing system using maximum pressure and its innovative anti-friction coating, the line glides easily through the rod guides with scarcely any friction, considerably increasing the casting distance and accuracy.

It also offers high tensile strength and friction resistance during the fishing action. Ideal for all types of fishing, in freshwater and saltwater alike.

Colour: Green.

Supplied as:

-150 metre spools. Pack of 6 spools.

-275 metre spools. Pack of 6 spools.

-1000 metre spools.

-3000 metre spools.

## KAZUMA PRO PE

This braid is the evolution of the well-known Kazuma line. The braiding process has evolved, treating its 4 high-quality PE braids with a new and improved anti-friction coating.

The result is a braid with a rounder profile and greater casting distance.

High tensile strength even for the finest diameters.

Colour: Grey.

Supplied as:

-100 m connected spools. Pack of 10 spools.

-300 metre spools in boxes of 6 spools.

-500 and 1000 m spools.

## fluoro carbon

The development of this new material has enable a unique truly INVISIBLE monofilament. The FLUOROCARBON light refraction index is practically the same as that of water.

This feature, and not line colour, enables the broken line to be eliminated that could otherwise alert fish.

Spools of 50 m.

Packaging of 10 spools.

Price per spool.

## NOBU FLUOROCARBON

100% fluorocarbon line with a perfect balance between invisibility and ductility. Thanks to its great abrasion resistance, this line is perfect for use in reels when fishing for predators in complicated conditions and also for terminal tackle rigging in salt and fresh water.

Supplied in 225 m. spools. Line marked ever 75 m.

Packs of 10 spools.

Price per spool.

# FLUORO CARBON coating

Fluorocarbon coated copolymer line, offering a refraction index similar to water, to make it practically invisible. It presents high abrasion resistance and low elasticity. Transparent in colour, in and out of the water.

Spools of 250 m. Packaging of 6 spools.  
Price per spool.

# FS CARBON FLUORO LINE

Monofilament line specifically designed for making surfcasting snoods and leaders.

The fluorocarbon coating of this line means that it is invisible underwater, while its nylon copolymer core makes it silky and flexible, offering outstanding knot strength and a smooth presentation.

What's more, its specific coating delivers the ultimate in abrasion resistance and breaking strength. Colour: transparent.

Supplied in 50 m spools.

Pack of 6 spools.

Price per spool.

# FX FLUORO-LINE

Copolymer with high tensile strength and abrasion resistance. Thanks to its special resin coating, the line is able to softly slip through the guide rings with hardly any friction. Also, as far as fishing action is concerned, the composition of these resins give the line an extremely low refractive index.

Colour: Green

Supplied in 150 m spools.

Pack of 6 spools.

Price per spool.

## BIG CARBON

This extruded nylon copolymer with a fluorocarbon coating offers the best qualities of nylon, abrasion resistance and easy knot tying, combined with the invisibility of fluorocarbon thanks to the fact that its refractive index is similar to water.

Its slight elasticity makes it the perfect line for rigging trolling leaders, making it easier to fight big fish. It also delivers good performance for jigging leaders and even main line surfcasting leaders.

Transparent, slightly blue colour.

Supplied in 50 m spools.

Pack of 6 spools.

Price per spool.

## TITANIUM SCC

### SILICON CLEAR COMPOSITE

The TITANIUM range has a long-standing reputation for reliability amongst anglers all over the world.

The new TITANIUM SILICON CLEAR COMPOSITE (SCC) is its natural progression.

A silicon coating has been applied to the monofilament to reduce its refractive index and make it almost invisible. Supplied in PVC boxes, one for each spool.

- Titanium SCC transparent: 150 m. spools. Pack of 10 spools.
- Titanium SCC grey: 300 m. spools. Pack of 10 spools.
- Titanium SCC red: 600 and 1000 m. spools. Pack of 5 spools.

Price per spool.

# ROSE

High-quality copolymer specially designed for eging anglers who need to fish with nylon. It is far more elastic and abrasion resistant than a braid, when in extremely rocky areas or whenever it is necessary to minimise squid tearing.

Thanks to its smoothness and flexibility, you can tie perfect knots and, what's more, its specific coating delivers the ultimate in breaking strength.

Its high visibility pink gives you complete control of the fishing action of your lure at all times.

Colour: pink.

Supplied in 150 m spools.

## HEAVY BAIT

Large capacity hook. Perfect for problem-free holding and securing bait that could easily come off in normal circumstances, such as mussels or any other type of mollusc.

Thanks to its angled shape it offers great resistance to material breakage and elongation. Ideal for fishing big sea bream or other types of fish that feed on molluscs or shellfish.

Prices per bag.

## YAMAME

The competition hook par excellence. This extremely fine wire hook is specifically designed to maintain the mobility of fragile, delicate baits such as the ragworm or sandworm, etc. The position of the barb is quite high, making it ideal for use with delicate bait to fish all types of bottom feeders. It's extremely quick and easy to remove the hook, in any situation, making it ideal for competitions.

REF.	2	4	6	8	10	12
A028NOS*						

Prices per bag.

## KANTUKI UMI TAMAGO

A straight hook with a medium shank, with a wide gap from the hook to the shank. This makes it perfect for hooking soft mouthed fish. Ideal for using with any type of bait, including fine bait such as the red worm.

REF.	1/0	1	2	4	6	8	10
A021NOS*							

Prices per bag.

## KANTUKI MARUSODE (RINGED EYE)

This extremely fine hook with a special micro-ring is perfect for surfcasting rigs. It is extremely effective in holding the bait.

REF.	2	4	6	8	10
A030ANOS*					

Prices per bag.

## KANTUKI KEIRU (RINGED EYE)

Extremely fine hook with micro ring, specially designed for maintaining the mobility of fragile baits. A good option for those anglers wanting to make the most of these characteristics in a ringed hook.

REF.	2	4	6	8	10
A031ANOS*					

Prices per bag.

A005NOS*					

Prices per bag.

## CHINTA MEBARU

The perfect hook for almost all competition fishing. It's more lightweight and much stronger than any hook of the same size. The hook with a turned-in micro barb prevents the fish from getting away. What's more the shank bend is wider than normal, increasing the hook hold. It can be used either with blood worms, sand worms or hard bait. This is an extremely flexible hook, for a whole range of bait and different types of fishing.

# SABIKIS ASARI AJI

The ASARI Japanese sabikis have been developed with high quality materials. The hand-crafted assembly pays particular attention to the finish of the knots, in order to avoid snagging problems, and the material is meticulously handled in order to achieve the utmost effectiveness.

## PRO

Multi-purpose Sabiki featuring 6 hooks with fish skin and rainbow and white fringes. ASARI Maruseigo hooks in a gold finish. The knot areas are reinforced with a dot of bright two-colour putty for increased visibility and effectiveness of the terminal tackle. It includes two-colour mini glow beads. Main line and branches in 100% fluorocarbon.

REF.	HOOKS	THREAD Ø BASE	THREAD Ø ARMS	€

BAP0112	12	0,37	0,29	
BAP0114	14	0,37	0,29	

## SENSE

Extra sensitive 6 hook Sabiki, to immediately detect the bites of small predators. Rigged with ASARI Chinta Mebaru hooks with a gold finish and fish skin and rainbow/cream fringes. Perfect for clear, bright water with no need for any other glow component. Main line and branches in 100% fluorocarbon.

BAP0212	12	0,33	0,24	
BAP0214	14	0,33	0,24	

## GLOW

Highly attractive 6-hook Sabiki thanks to its glow fish skin. It features rainbow fringes and large two-colour beads, with a high glow level. Rigged with an ASARI Maruseigo hook, this sabiki is designed for dark waters or times when there is little light. Main line and branches in 100% fluorocarbon.

KG	12	15	21	31	43

## CRANCK BAIT SNAP

Safety snap for artificial lure with over-sized end to distribute the pressure over a wider curve.  
This makes it far easier to change bait and makes it exceedingly strong.

## QUICK LOCK SNAP

Snap specially designed for easy lure changes. This is extremely practical for fishing such as eging in which the size and colour of the lure is changed frequently until the ideal lure is found for the fishing conditions at the time.
