MASARU inku

12-strand PE braided line, with great castability and tensile strength.
Thanks to its rounded profile, smoothness and specific coating, it glides through the rod guides with practically no friction during casting, maximising the lure casting distance and avoiding unpleasant noises during retrieval.
Its bubblegum pink colour helps you to monitor the position of your lure at all times in order to maintain the line tension and control even the gentlest of takes to ensure a successful bite.
Perfect for super-technical fishing such as eging and rock fishing.
Supplied in 150m spools. Pack of 6 spools.
Price per spool.

MASARU jerk

12 fibre PE braided line. Thanks to the fibre coating and innovative braiding process, we have achieved a round, extra-fine line with a calibrated diameter along the entire length.
These features mean that, when fishing, the line will experience minimal friction and offer tremendous strength, even in the extremely fine starting diameters. Perfect for super-technical fishing such as eging, rock fishing and light spinning. High visibility silver.
Supplied in 150m spools. Pack of 6 spools.
Price per spool.

STONE MASARU

NEW!

8 fibre PE braided line. The pre-braiding treatment of the fibres achieves a really soft feel and gives an extremely round and uniform shape.
Normally, these characteristics involve a gradual loss of colour and strength, but this doesn't happen with the MASARU PEARL.
In fact, there are no changes to the initial line characteristics even after many days of fishing. Green.
Supplied in 150 and 300 m spools. Pack of 6 spools.
Price per spool.

POWER MASARU

8 fibre PE braided line, offering a uniform, round diameter and extraordinary strength.
Being dark green in colour, it is perfect for spinning or light jigging, whilst it is long-lasting thanks to its surface treatment.
During the fishing action, the line moves smoothly through the guides, with little friction, as if it were a mono-filament line.
Colour: Dark green.
Presentations:
- 150 and 300 metre spools in boxes of 6 spools.
- 1000 and 2000 meter spools.
Price per spool.

MASARU Light colors

8 fibre multi-colour PE braided line, featuring complete roundness and extraordinary strength. The Teflon surface coating allows it to softly slip through the guide rings with hardly any friction. Colour change every 10 metres, with an intermediate 5 metre mark, for total control of the casting distance and depth.
Perfect for vertical light jigging and spin casting.
Presentations:
Supplied in 300 metre spools in boxes of 6 spools
Price per spool.

KAZUMA gloss MAX

8-strand PE braided line, specifically designed for eging enthusiasts. Its innovative braiding process, at maximum pressure, produces a more compact line that it absorbs less water during the fishing action. Thanks to its sensitivity and low elasticity, you can work your egis with great precision and will detect even the smallest squid bites.
Its innovative coating minimises resistance through the guides, achieving longer casts and minimising the formation of the much-feared “birds nests” when casting extremely light weights on windy days. Hi-vis pink when out of the water.
Supplied in 150 and 300 m spools. Pack of 6 spools.
Price per spool.

KAZUMA PRO PE

This braid is the evolution of the well-known Kazuma line. The braiding process has evolved, treating its 4 high-quality PE braids with a new and improved anti-friction coating.
The result is a braid with a rounder profile and greater casting distance.
High tensile strength even for the finest diameters.
Colour: Grey. Supplied as:
-100 m connected spools. Pack of 10 spools.
-300 metre spools in boxes of 6 spools.
-500 and 1000 m spools.

8XK

High quality 8-strand PE braided line.
Thanks to its innovative manufacturing system using maximum pressure and its innovative anti-friction coating, the line glides easily through the rod guides with scarcely any friction, considerably increasing the casting distance and accuracy. It also offers high tensile strength and friction resistance during the fishing action. Ideal for all types of fishing, in freshwater and saltwater alike. Colour: Green.
Supplied as:
-150 metre spools. Pack of 6 spools.
-275 metre spools. Pack of 6 spools.
-1000 metre spools. -3000 metre spools.

8X K MULTICOLOR NEW!

Multicolor braided line made up of high-quality 8-strand PE. It changes color every 10 metres with a white mark every metre. These separations further increase the high visibility of the 5 colors in this line. It has an ultra-round profile braided under high pressure and a specific anti-friction coating, which breaks the belief that multicolor line is exclusively for vertical fishing and makes the 8X-K multicolor one of the most versatile options on the market.
Supplied in 275 m spools. Pack of 6 spools.
Price per spool.

8X SPIN K

This 8-strand braided line is specially designed for ultra-light rock fishing and spinning. Its ultra-round, high-pressure braided profile and its specific anti-friction coating favour the longest casts even with the lightest lures.
The high-visibility fluo green colour will help you know where your lure is at all times.
Supplied in 150 m spools. Pack of 6 spools.
Price per spool.

4X-K

4-strand braided line for anglers who need a braided line with good performance in terms of resistance without making a big outlay. Thanks to its innovative braiding system, the line is soft and strong and has a great casting capacity.
Olive green colour perfect for both salt and freshwater fishing.
Supplied in:
- Spool of 150 m. Pack of 6 spools.
- Spools of 300 m. Pack of 6 spools.

FCX MAX FLUOROCARBON

NEW!

100% Japanese-made fluorocarbon line, with a perfect balance between invisibility and ductility. It has great abrasion resistance and, despite its rigidity, it is very easy to "press the knots".
Perfect for our leaders in all fishing modalities thanks to its wide range of diameters, from the thinnest to the most powerful. The FCX Max comes in a pink version.

Although fluorocarbon is almost imperceptible underwater, the pink color retains even more invisibility, especially in murky or low-light waters.

Supplied in 30m, 50m and 100 m spools. Pack of 5 spools.
Price per spool.

fluoro carbon

The development of this new material has enable a unique truly INVISIBLE monofilament. The FLUOROCARBON light refraction index is practically the same as that of water. This feature, and not line colour, enables the broken line to be eliminated that could otherwise alert fish.
Supplied in 50 m spools.
Packaging of 10 spools.
Price per spool.

HORI FLUOROCARBON

NEW!

100% invisible fluorocarbon line, highly flexible, low stretch and very little memory. Its innovative yellow color offers high visibility for the angler while maintaining invisibility underwater thanks to the diffraction generated by its carbon composition. It is the perfect choice for fishing in low light conditions (dawn and dusk). Color: yellow.
Supplied in 100 m spools. Pack of 6 spools.
Price per spool.

C6K FLUOROCARBON LINE

100% fluorocarbon line, completely invisible, extremely supple, low stretch and near zero memory. It is extremely resistant to abrasion, high temperatures and UV rays. Perfect for terminal tackle rigging thanks to its invisibility and to its ease of splicing your hooks.
Its perfect balance between rigidity and flexibility will give your terminal tackle optimal presentation in saltwater and freshwater alike.
Supplied in 100m spools. Pack of 6 spools.
Price per spool.

NOBU FLUOROCARBON

100% fluorocarbon line with a perfect balance between invisibility and ductility. Thanks to its great abrasion resistance, this line is perfect for use in reels when fishing for predators in complicated conditions and also for terminal tackle rigging in salt and fresh water.
Supplied in 225 m. spools. Line marked ever 75 m.
Packs of 10 spools.
Price per spool.

GLIDE CARBON

Fluorocarbon coated and siliconised copolymer with high underwater invisibility. Perfect for rigging leaders or as bottom or surf casting reel line. It is highly resistant to abrasion and UV rays. Thanks to its large selection of diameters, it can be used for any type of fishing where discretion, invisibility and resistance are required.
Supplied in:
300 m spools. Packs of 6 spools.
1000 m spools (0.45 mm spools of 800m and 0.50 spools of 680m).

FSL FLUOROLINE

Monofilament line specifically designed for making surfcasting leaders. Just like other top-of-the-range monofilaments made by ASARI, the FSL FLUOROLINE features a fluorocarbon coating that gives it a silky, supple texture. It also makes knotting and splicing much easier and effective.
Supplied in 150m spools. Pack of 6 spools.
Price per spool.

FX FLUORO-LINE

Copolymer with high tensile strength and abrasion resistance.
Thanks to its special resin coating, the line is able to softly slip through the guide rings with hardly any friction. Also, as far as fishing action is concerned, the composition of these resins give the line an extremely low refractive index.
Colour: Green
Supplied in 150 m spools.

BIG CARBON

This extruded nylon copolymer with a fluorocarbon coating offers the best qualities of nylon, abrasion resistance and easy knot tying, combined with the invisibility of fluorocarbon thanks to the fact that its refractive index is similar to water.
Its slight elasticity makes it the perfect line for rigging trolling leaders, making it easier to fight big fish. It also delivers good performance for jigging leaders and even main line surfcasting leaders.
Transparent, slightly blue colour.
Supplied in 50 m spools.
Pack of 6 spools. Price per spool.

TITANIUM SFL
SILICON FLUORO LINE

As part of the new TITANIUM lines, the TITANIUM SILICON FLUORO LINE (SFL) is a step forward with regard to quality and strength. The line is coated with a special wax for reduced guide friction during casting and for increased rub resistance in rocky areas, which really put monofilaments to the test. Available in two colours:
Transparent: promotes invisibility in really crystal-clear waters.
Multicolour: facilitates visual assessments of the line length in the water.
Supplied in 300 m spools xcept for the 0.60 diameter which contains 240m. Pack of 10 spools. Price per spool.

TITANIUM SCC
SILICON CLEAR COMPOSITE

The TITANIUM range has a long-standing reputation for reliability amongst anglers all over the world. The new TITANIUM SILICON CLEAR COMPOSITE (SCC) is its natural progression.
A silicon coating has been applied to the monofilament to reduce its refractive index and make it almost invisible. Supplied in PVC boxes, one for each spool.
- Titanium SCC transparent: 150 m. spools. Pack of 10 spools.
- Titanium SCC grey: 300 m. spools. Pack of 10 spools.
- Titanium SCC red: 600 and 1000 m. spools. Pack of 5 spools.
Price per spool.

LONG CAST

Monofilament specifically designed for casting, with a good strength/elasticity ratio and a really pleasant feel. It offers good knot resistance and high abrasion resistance. Light blue.
Supplied in 300 m and 1.000 m spools. Pack of 6 spools. Price per spool.

CAPTURE

Monofilament for filling both fresh and saltwater reels, with a high resistance to abrasion and knotting. It has an external anti-friction coating that makes it ideal for fishing in rocky areas and lush vegetation where snagging and rubbing are very common.

- Supplied in:
150 m spools of transparent colour. Packs of 6 spools.
Spools of 300 m light blue colour. Packs of 6 spools.
Price per spool.

ROSE

High-quality copolymer specially designed for eging anglers who need to fish with nylon. It is far more elastic and abrasion resistant than a braid, when in extremely rocky areas or whenever it is necessary to minimise squid tearing.
Thanks to its smoothness and flexibility, you can tie perfect knots and, what's more, its specific coating delivers the ultimate in breaking strength.
Its high visibility pink gives you complete control of the fishing action of your lure at all times. Colour: pink.
Supplied in 150 m spools. Pack of 12 spools. Price per spool.

VISION

High-vis solid orange monofilament. These features make it perfect for fishing in those situations in which you need to see the line, such as buoy fishing, night fishing for squid and even as an indicator for terminal tackle rigging for ninfa fishing.
Supplied in 150 m spools. Pack of 12 spools. Price per spool.

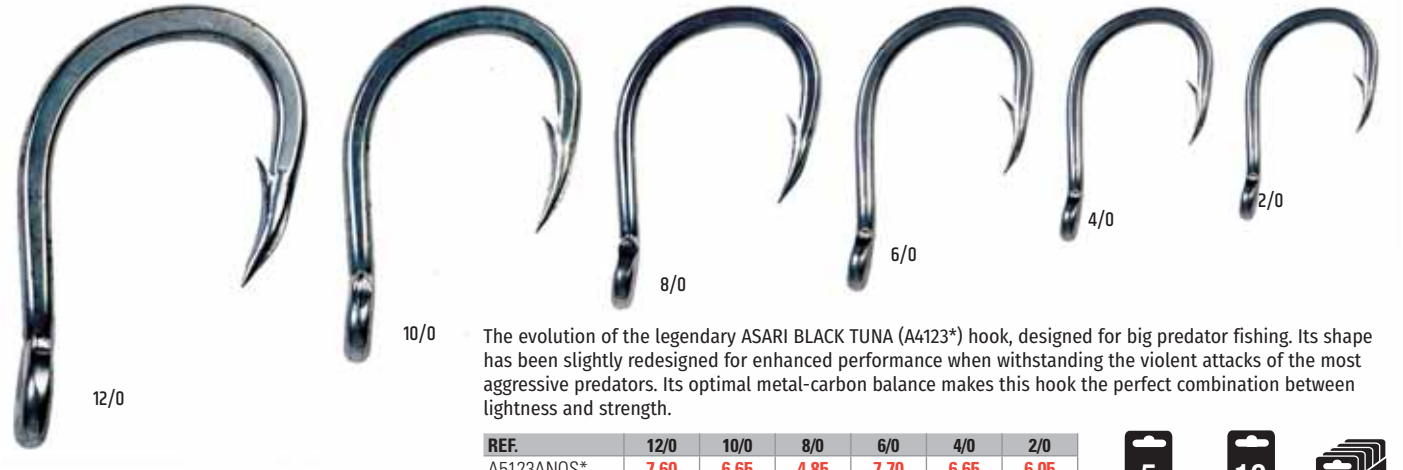
BAIT TUNA

NO · Short · Extra Strong



The evolution of the legendary ASARI BLACK TUNA (A4123*) hook, designed for big predator fishing. Its shape has been slightly redesigned for enhanced performance when withstanding the violent attacks of the most aggressive predators. Its optimal metal-carbon balance makes this hook the perfect combination between lightness and strength.

SW DEEP DROP NEW!

Short · Extra Strong

Hook designed for catching the strongest saltwater species. It can be used both as a drop shot hook and as an assist hook with slow jigging lures. Beyond its high friction, the distinguishing feature of this hook is its iridescence, an optical phenomenon in which the colours change depending on the angle of view or the lighting. With movement, we get brightness and colour change, generating a more subtle and effective attraction than with a conventional finish.

OUTBARB ISEAMA

NEW!

NO · Short

The ASARI ISEAMA hook is known for being a strong hook of modest size, designed for bottom fishing from boats, as well as for holding harder lures such as crabs, mussels, etc. The OUTBARB is an evolution of the classic ISEAMA, moving the 'barb' to the outside of the hook. This arrangement facilitates hooking and makes failed bites successful without compromising the safety offered by a conventional point.

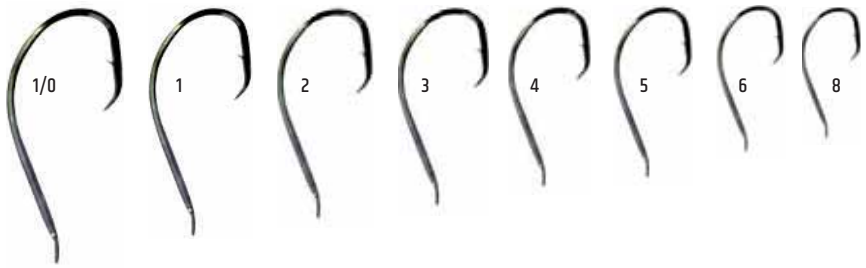
MARUSEIGO NEMURI

NEW!

NO · Long

Maruseigo-shaped hook that is slightly thicker than the conventional Maruseigo and has a parrot-beak point that is very closed and flat on the sides, making it the perfect hook for strong lures in surfcasting or from a boat at anchor.



REF.	1/0	1	2	3	4	5	6	8

YAMAME

The competition hook par excellence. This extremely fine wire hook is specifically designed to maintain the mobility of fragile, delicate baits such as the ragworm or sandworm, etc. The position of the barb is quite high, making it ideal for use with delicate bait to fish all types of bottom feeders. It's extremely quick and easy to remove the hook, in any situation, making it ideal for competitions.

SABIKIS ASARI AJI

The ASARI Japanese sabikis have been developed with high quality materials. The hand-crafted assembly pays particular attention to the finish of the knots, in order to avoid snagging problems, and the material is meticulously handled in order to achieve the utmost effectiveness.

10 | 10

PRO

Multi-purpose Sabiki featuring 6 hooks with fish skin and rainbow and white fringes. ASARI Maruseigo hooks in a gold finish. The knot areas are reinforced with a dot of bright two-colour putty for increased visibility and effectiveness of the terminal tackle. It includes two-colour mini glow beads. Main line and branches in 100% fluorocarbon.

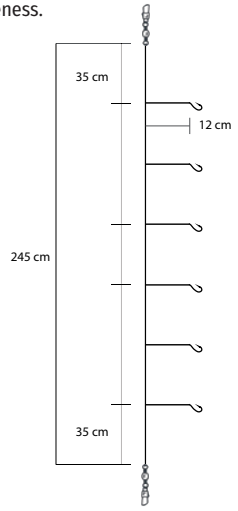
BAP0114	14	0,37	0,29	8,95



GLOW

Highly attractive 6-hook Sabiki thanks to its glow fish skin.
It features rainbow fringes and large two-colour beads, with a high glow level.
Rigged with an ASARI Maruseigo hook, this sabiki is designed for dark waters or times when there is little light.
Main line and branches in 100% fluorocarbon.

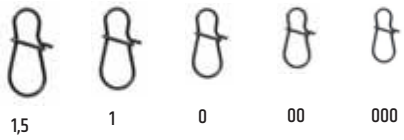
ROUND SNAP NEW!

Very compact snap, designed to affect the swimming action of the lures as little as possible. This makes it particularly suitable for small or light lures.

OARD*	1,5	1	0	00	000
€	1,85	1,85	1,80	1,75	1,75
	5	5	5	6	6
LBS	24	22	20	18	12
KG	11	10	9	8	5

10



V-SNAP NEW!

Compact V-shaped snap that concentrates the pressure on a single point, allowing more precise changes of direction with jerking, walking the dog or other techniques.

OAVS*	2	1	0	00	000
€	1,99	1,90	1,85	1,80	1,75
