ISO THUNDERBOLT NEW!

Special ISO rod for fishing from rocks and breakwaters, designed to offer precision and power when facing large fish near structures. Lightweight and fast-action blank combines precision with the necessary reserve to control fish that take refuge in reefs or rocky areas. Its construction minimises twist under load, providing greater control during the fight. Sensitive tip (in solid carbon mix with tubular in the lighter actions and fully tubular in the stronger ones) clearly transmits even the slightest bites, allowing you to detect light signals on rocky bottoms. During the fight, its flexible yet robust blank absorbs sudden runs and reduces the risk of losing the fish or breaking the line.
Low bridge oval SIC guides. Ergonomic handle with grip. FUJI zip reel seat. Padded fabric cover.
