AURA
FLUOROCARBON 100%

100% fluorocarbon line specially designed to make surfcasting line rigs. Its main feature is its ease to "press" the knots, with which our rig will be perfect. The optimum point of hardness of this line, will avoid the rig twist in rough sea conditions. Totally invisible under water and with a highly resistant to abrasion.
Supplied in 50 and 100 m. spools

IGNITION Surf

Monofilament line specifically designed for surfcasting competition fishing. Thanks to its innovative silicone coating it smoothly slides through the guides, giving it a longer casting distance than its competitors. Moreover, it offers greater resistance to degradation by the sun and saltpetre, considerably lengthening its useful life in relation to other lines. Longer casting distances and unaltered quality for many more days...
Colour: Dark red.
Supplied in 1000 and 3000 m. spools

BREZZA

Monofilament, designed for long casts away from the beach when required by the sea conditions. Thanks to its silicone coating, it glides easily through the guides while offering extra protection to the line itself and lengthening its useful life.
Available in:
-Transparent: 1000 m spools.
-Red: 3000 m spools.
Pack of 6 spools.

Vercelli

TAPER LINE

220 metre high-quality copolymer monofilament line spools.
Comprising 200 metres of fine diameter, perfectly calibrated nylon, ending in a robust 0.57 mm tapered leader.
As there are no joining knots, the line can slide quickly and smoothly through the rings, helping you to gain those vital extra casting metres that make the difference between catching or losing a fish.
The powerful 0.57 mm finish perfectly cushions the impact of even the hardest casts.
Price per spool.

6

TAPERED SHOCK LEADER

Set of 15 metre tapered leaders, specifically designed for surf casting.
Made from high-quality copolymer with excellent knot strength and superior abrasion resistance, ending in a powerful 0.57-0.70 mm diameter; the first 5 metres are tapered, increasing from the initial diameter up to hock diameter for the final 10 metres, perfectly cushioning the impact of even the hardest casts.

SOLID ORANGE

High visibility solid orange colour for full control of the entry of the terminal tackle on the rod. Price per spool.

FLOATERS

ODOROUS

High-density foam floaters, hand-made and painted, specifically designed for keeping the bait off the bottom. Perfect for those summer days in which the fish are wary, and feed in mid water. What's more, this prevents the bait from remaining on the bottom, to be eaten by shellfish. Available in 2 sizes, with a glitter finish (BVFM/BVFL) for day fishing and a fluorescent finish (BVFLL) for night fishing.
Models BVFOM* and BVFOL* are made with a pigment that gives off an odour that is extremely attractive to fish.

REF.	mm		€
